LEARN HOW TO EASILY MAINTAIN AND CLEAN YOUR ALUMINIUM WINDOWS AND DOORS

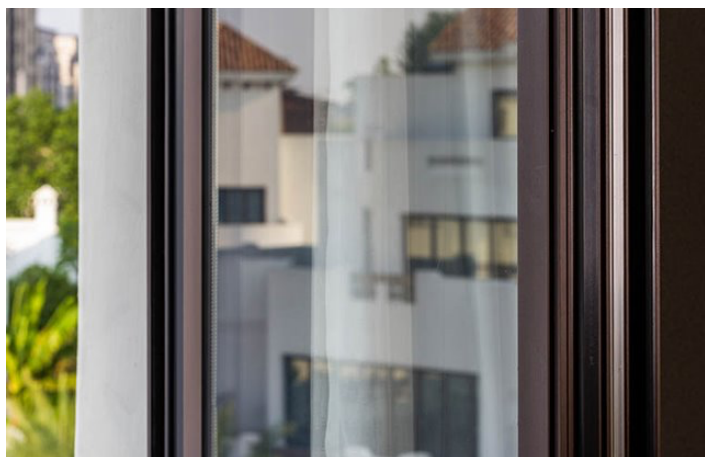

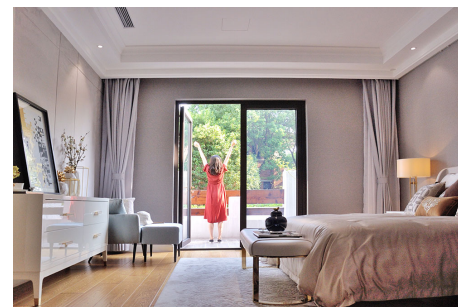

Aluminium frames require no special maintenance to keep them from corrupting or cracking, while its smooth surface makes it easy to clean. The regular recommended maintenance is as simple as a soft cloth and cleaning detergent to wipe away dust and dirt. That's all there is to it! Your frames look brand-new again!

As with any product, aluminium windows and doors require some care to guarantee the longest lifespan possible. Frequency of cleaning will depend on some factors, such as geography or levels of atmospheric pollution in your area.

However, keeping your aluminium windows and doors clean is remarkably easy. Here are our top tips on keeping aluminium frames looking great:

- **Clean the aluminium frames regularly** to keep the paint finish looking fresh.
- Use **non-abrasive cleaners** or **water** mixed with mild soap and a soft cloth.
- Keep the window and door tracks **free from stones, debris, and dirt**.
- Keep the inside of the **lock clean and lubricate it** with a little bit of oil every three months.

With regular cleaning and maintenance, you'll keep your **aluminium windows and doors** looking their very best over time.

CHOOSING THE RIGHT WINDOW OR DOOR OPENING OPTION

There are a few different options for window and door openings, each with its own features and advantages. In this article, we give you a complete overview and help you determine which best suits your needs. Whatever window or door configuration you are searching for, AluK Home has it!
